Enclosure No. 2

tube, connected to fluid pressure which mechanism comprises a hermetic cavity (60), limited by a cylinder (56), a piston (57), an elastic tube (59) and is connected to fluid pressure.

**Claim 13 (Currently amended).** The endoscope according to any of claims 1 to ~~((3))~~ 6, wherein the endoscopic tube (3) has a comprises internal transverse pleats (48) of its external cover, which are directed inwards.

**Claim 14 (Canceled).**

**Claim 15 (Currently amended).** The endoscope according to any of claims 1 to ~~((3))~~ 6, wherein the endoscopic tube (3) comprises distal drives of traction lines (40, 41), bending the distal end of the endoscopic tube (3), which drives are comprise executing cylinder-piston units connected to the pressure of gas or liquid.

**Claim 16 (Canceled).**

**Claim 17 (Currently amended).** The endoscope according to any of claims 1 to ~~((3))~~ 6, wherein the endoscopic tube (3) has comprises a biopsy channel, connected to fluid pressure and biopsy forceps (63), which are a flexible hermetic tube with a piston (66) of the biopsy channel on the distal end of said tube.

**Claim 18 (Currently amended).** The endoscope according to claim 17, wherein the biopsy forceps (63) have a distal drive of forceps which is a cylinder-piston unit connected to fluid pressure comprise an intensifier (71) of a traction line, which intensifier comprises an executing cylinder-piston unit, located on the distal end of the hermetic tube and of the traction line.

**Claim 19-20 (Canceled).**

**Claim 21 (New).** The endoscope according to claim 5, wherein the tip (8) comprises a channel (32) for inflation of the intestines and prevention of ingress of intestinal contents under the protective glass (33).

**Claim 22 (New).** The endoscope according to any of claims 4 to 6, wherein the endoscopic tube (3) comprises areas (28) for the hermetic fixation of the distal preservative (26) united with the tip (6).

Faithfully Yours,

Dr. Sergey Matasov
